

Basic Detail Report

Snuff-Horn

Date
1830-1845

Medium
Bone, leather

Description

Snuff horn made of a small dark-brown horn with the pointed end sawn off to form a small hole to extract the snuff. The original stopper is missing. It has a hide base, and a strap of hide is attached through two holes drilled midway through the inner curve. The strap could be drawn through to adjust the length. Bechuana (Botswana). African subcontinent.
