

Fish-Hook

Date
1700-1900

Medium
Wood, bark, plant fibre

Description

Medium halibut hook. The shaft is made of wood bent back on itself in a loop. A long straight barb of wood is lashed to the top of the shaft on the inside of the loop. There is a bar of lashed and knotted twine across the loop to hold it in place. Nootka sound.

Dimensions

Object/Work: 161 x 65 mm
