

Basic Detail Report

Fish-Hook

Date

1700-1900

Medium

Wood, bark, bone

Description

Large fish hook made of a bent piece of wood, for catching halibut. The wood element curves back onto itself with a section of the tapering end projecting out from the shaft. A sharp, straight barb of bone is lashed onto the shaft with flat bark on the inside of the loop. Nootka Sound.

Dimensions

Object/Work: 210 x 86 x 13 mm
