

Basic Detail Report

Patten

Date

1700-1770

Medium

Wood, leather, iron

Description

Lady's patten. Consists of a wooden sole with a block heel, fixed to circular iron ring by iron bars. It would have

been fastened with a leather strip tied with a lace. The purpose of the patten was to raise the shoe in order to avoid walking in mud and effluent.

Dimensions

Object/Work: 200 x 100 mm
