

Fuming-Pot

Date

1500-1600

Medium

Earthenware

Description

Fuming pot stand. The top is flat and open with a vertical rim and a handle at one side. There are holes drilled through the bottom to the pedestal base. The hollow base has a triangular section cut out for inserting coals. The interior is glazed yellow. It was found at Bishopsgate street, on June 30th 1865.
